TECHNOLOGY CENTER 2800

Sir,

Responsive to the Office Action mailed on May 01, 2003, please amend the above-identified application as follows:

AMENDMENT**IN THE CLAIM**

Please cancel claim 2 without prejudice or disclaimer of the subject matter thereof, and replace original claim 1 with the clean copy of amended claim 1, as follows:

CLEAN COPY OF THE AMMENDED CLAIMS

1. (Amended) A magnetic material fixing structure of motor rotor, comprising at least one silicon steel plate, an outer circumference of the silicon steel plate being recessed to form multiple receptacles at equal intervals, a magnetic material being disposed in each receptacles, each receptacle and the silicon steel plate defining two lateral faces, a bottom face and an opening opposite to the bottom face, the opening of the receptacle being slightly smaller than an internal width of the receptacle and the two lateral faces being slopes gradually diverging from outer side
